

FREE INDOOR AIR TOOL KIT PROGRAM

The Office of Environmental Health is offering indoor air tool kits to qualifying patients. Using the provided items may help improve indoor air quality and reduce respiratory triggers in the home.

Qualifying patients are **high-risk pediatric patients with severe and/or chronic lung disease (including asthma, recurrent pneumonias, etc.)**. Other patients may qualify on case-by-case basis.

Participants will be asked to complete a short questionnaire with OEH staff and accept periodic check-in calls (to verify tool-kit items remain functional). The program is at no cost to participants.

For questions, or to refer a patient for a FREE tool-kit, providers can contact OEH through one of the following methods:

- Email: OEHDeptList@ykhc.org,
- Tigertext: "OEHE On-Call", or,
- Call the OEHE mainline: 907-543-6420.

*In the referral message, please provide the patient's name, DOB and contact info, **including guardian name and a working phone number**, if available.*

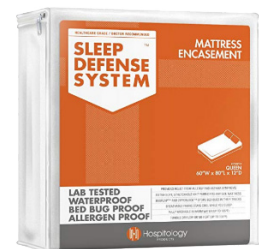

WHAT'S IN THE KIT

HEPA air purifiers

Allergen pillow cover

Mattress cover

Combo smoke/carbon monoxide detector

Wood stove thermometer

Moisture meter (for fire wood)

Hygrometer (measures humidity)
